SUMMARY

Third-year B.Tech Computer Science Engineering student with strong interest in software development and core Computer Science. Skilled in Java, DSA, and Web Development (MERN), seeking real-world opportunities.

EXPERIENCE

Learner

Coding Thinker

03/2025 – Present

Gwalior

- Built full-stack web applications using MERN stack (MongoDB, Express, React, Node.js)
- Developed REST APIs and integrated frontend with backend services
- Developed dynamic and responsive frontend applications using React with component-based architecture
- Integrated MongoDB database using Mongoose for efficient data storage and CRUD operations
- Implemented core JavaScript concepts including ES6, functions, events, and DOM manipulation
- Solved 250+ problems on LeetCode focusing on Data Structures and Algorithms
- Improved debugging, analytical thinking, and problem-solving skills

EDUCATION

B.Tech in Computer Science

Shree Ram Institute of Technology and Management

2023 – 2027

Gwalior GPA: 6.5 / 10

Higher Secondary School

Oracle Hr.Sec School

2022 – 2023

Gwalior Percentage: 81%

High School

Orchid Hr.Sec School

2020 – 2021

Gwalior Percentage: 83%

SKILLS

Frontend: HTML, CSS, JavaScript, React, Tailwind, Bootstrap

Backend: Node.js, Express.js, JWT, REST APIs, Authentication & Authorization, Multer, Cloudinary, Razorpay

DataBases: MongoDB, SQL

Tools: Git, GitHub, Postman, VS Code

Languages: Java, JavaScript, HTML, CSS

PROJECTS

Education Point – Full Stack EdTech Platform

[Live Demo](#) — [GitHub Repository](#)

- Developed a full-stack educational platform using React, Node.js, Express.js, and MongoDB.
- Implemented JWT Authentication, Authorization, Email OTP Verification, and role-based access control.
- Integrated Razorpay payment gateway and Cloudinary for secure payments and file uploads.
- Built course management, cart, and purchase workflows through RESTful APIs.
- Designed a responsive UI and scalable backend architecture following MERN stack best practices.

Movie Explorer

[GitHub Repository](#)

- Developed a movie search application with rating-based filtering using React
- Implemented features like add to favourites, remove from favourites, and view detailed movie information.
- Handled multiple movie listings with pagination for better user experience

AI-Vocabulary-Builder

[GitHub Repository](#)

- Built an AI-based vocabulary tool using JavaScript and external APIs.
- Implemented features like word search, quiz, and data handling.
